Professional Summary

Backend Engineer with 3 years of experience designing and developing RESTful APIs using Python (FastAPI) and Node.js. Strong expertise in relational database design, JWT-based authentication, and scalable backend architecture. Experienced in integrating cloud SQL databases, Docker containerization, and deploying production-ready backend systems. Passionate about building secure, reliable, and well-structured backend services.

Technical Skills

- **Languages:** Python, JavaScript
- **Backend:** FastAPI, Flask, Node.js
- **Database:** SQL, MySQL, MongoDB
- **ORM:** SQLAlchemy
- **Authentication:** JWT, Argon2
- **Deployment & DevOps:** AWS, Render, Vercel, Docker, Docker Compose
- **Tools:** Git, Postman

Experience

Nevaluer Technologies Pvt Ltd

Software Engineer

SALEM, Tamil Nadu

Feb 2023 – Present

- Designed and developed RESTful APIs using Python (FastAPI) and Node.js
- Built backend services supporting web and mobile applications
- Designed and optimized relational database schemas and SQL queries
- Implemented authentication and authorization mechanisms for secure API access
- Integrated backend systems with cloud platforms for deployment and scalability
- Collaborated with frontend teams to ensure seamless API integration
- Containerized backend applications using Docker for consistent development and deployment.

Personal Backend Projects

HireMe API – Job Application Management System (Live)

Live Demo: <https://hireme-75o8.onrender.com/docs>

- Designed relational schema (Users, Jobs, Applications) using SQLAlchemy ORM
- Implemented JWT-based authentication and role-based access control (Admin/User)
- Secured password storage using Argon2 hashing
- Integrated FastAPI with TiDB Cloud using SSL-secured connection
- Deployed production-ready backend API on Render
- Built complete workflow: user registration, login, job creation, and job applications
- Designed modular project architecture using routers, dependency injection, and ORM-based data modeling.
- Containerized the FastAPI application using Docker and Docker Compose for easy local development and deployment.

Education

Mohamed Sathak Engineering College

B.E. in Aeronautical Engineering

2017 – 2021

CGPA: 7.1
